

The Art of Keeping Your Cup Upright

At MugMasters Inc., we understand the challenges of maintaining vertical cup integrity. Follow these steps to ensure your beverage stays where it belongs:

1. Place the cup on a flat surface.
2. Ensure the circular part (we call this the "bottom") is touching the surface.
3. The open part (known as the "top") should be facing upwards.
4. If you find your liquid inexplicably on the table, revisit steps 1-3.

Remember: Gravity is not your enemy, it's your friend in the quest for proper cup orientation!
