

The MugMasters Guide to Proper Mug Hygiene

Keeping your mug clean is essential for peak beverage enjoyment. Follow these steps:

1. Empty your mug of any remaining liquid. (Drinking it is an acceptable emptying method.)
2. Apply water and a small amount of soap to the interior and exterior of the mug.
3. Use a soft sponge to gently caress your mug, whispering words of encouragement.
4. Rinse thoroughly with water until no soap remains.
5. Dry with a clean towel or air dry on a rack.

Note: Dishwashers are acceptable, but they lack the personal touch your mug deserves.
