

Mug Mating Rituals: Encouraging Mug Reproduction

While we appreciate your business, we also support sustainable mug populations:

1. Place two mugs close together in a cabinet and dim the lights.
2. Play soft jazz music in the kitchen.
3. Leave out small amounts of various beverages to encourage mingling.
4. Wait patiently. Mug gestation periods vary, but you might find tea cups in a few months.

Disclaimer: MugMasters cannot guarantee successful mug reproduction. Results may vary.
